

# Sony Alpha SLT-A55V Battery Replacement

Written By: Sultan Almunif

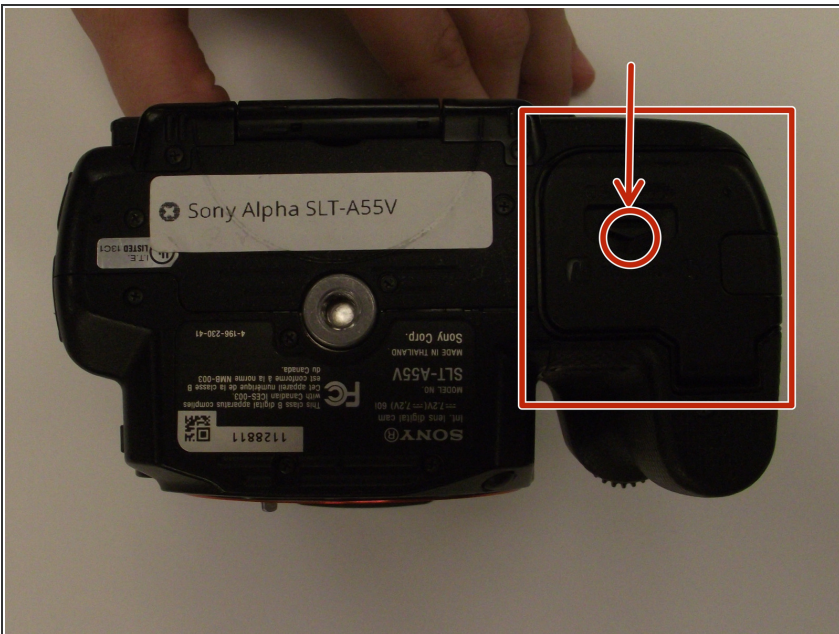

## Step 1 — Battery

- The SLT-A55V uses a 7.2 volt 1080 mAh rechargeable lithium ion battery. The part number for this battery is NP-FW50.
- Replacements can be found in many retailers online such as battery depot or amazon, as in the links below.
- **Battery Depot**  
<http://www.battdepot.com/us/model/digita...>
- **Amazon**  
<http://www.amazon.com/NP-FW50-Rechargeab...>

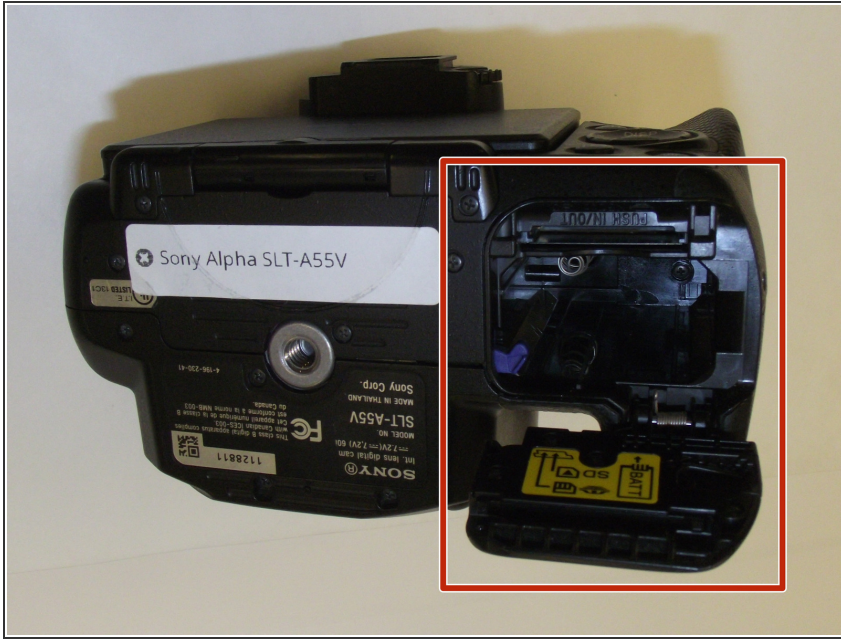

## Step 2

- The battery compartment is located on the bottom of the unit. Slide the latch down to open the cover.

## Step 3

- Insert the new battery and close the compartment.
- Important note: Most new lithium batteries are partially charged to improve shelf life. It is recommended to charge the battery after installation even if the indicator shows a full charge. Unlike nickel cadmium batteries, lithium batteries will provide better performance when charged to full capacity from a partial charge of 60%.

To reassemble your device, follow these instructions in reverse order.
